EXPERIENCE

GENERAL ASSEMBLY
Providence RI November 2016 - February 2017

This 13 week immersive web development program focused on understanding and implementing several popular full stack web technologies. This includes learning object oriented programming, MVC frameworks, data modeling and test driven development. Worked individually and in teams to created the following projects.

SimonClone - Using HTML, CSS and Javascript replicated the classic memory game.

JobTymr - A Ruby on Rails web app for freelancers to track time spent on jobs.

Art Pear - A web app built using Angular, Node, Express and Mongo db that facilitated the connection between artists and people looking to hire artists.

Snipp-Share - A React front-end that connected to a Ruby on Rails API that allows a user and categorize to store code snippets.

HASBRO (GRA{PHIC DESIGNER)
Pawtucket RI March 2015 - March 2016

Developed projects individually and as part of the Action Brand team. Partnered with marketing, product design and engineering to create packaging and brand assets used globally. Was also the creative lead on European content and image adaptations working closely with the Hong Kong team.

LULU STUDIOS (GRAPHIC DESIGNER)
Charlestown RI 2012 - 2016

Created in-store merchandising documents, product renderings and print graphics as well as web layouts for luxury cosmetic brands as well as local businesses.

HAUSER FOODS INC. (GRAPHIC DESIGNER)
Westerly RI 2011 - 2014

Created catalogs as the in-house graphic designer, and was also responsible for creating packaging and marketing materials for Hauser and their clients
